GATHERING SPACE IN CPL'S ROCHESTER OFFICE
 MODIFICATIONS FACILITATE SAFE COLLABORATION AND INTERACTION.

REIMAGINE YOUR WORK ENVIRONMENT WITH CPL

CPL is committed to working with you during and after this unprecedented health crisis. We understand that your primary concerns center around the health, safety and well-being of your staff and the people you serve. We share this common goal and we are ready to assist you with interior space planning recommendations and design services.

The COVID-19 pandemic has forced us to look at spaces through a different lens, allowing us to identify several elements of the interior environment that should be considered for improvements, modifications or replacement. One of the most critical considerations should be on the density of people in a specific area.

Research has indicated that the 6' feet apart guidelines slows the spread of the virus. This guideline impacts seating arrangements, classroom layouts, workstation

Let's revisit the physical environment together. We can create spaces that are both safe and inviting.

sizes and orientations, among many other things. As we continue to move forward, protective measure such as barriers and shields, touchpoints and proper signage should all be reviewed and considered, as these types of strategies can be employed to control the transmission of airborne infectious pathogens.

Our design team experts understand that some of these space arrangements and strategies will be temporary and some can be developed as more permanent solutions and renovation projects. Each solution is unique.

CPL is ready to help you by staying current with the everchanging guidance and regulations. We stand ready to work with you through this crisis in order to achieve your ultimate goal of health and safety.

A holistic approach to the interior environment should be considered. Recommendations will likely include a combination of strategies that are best suited for your building space.

STANDARDS AND GUIDELINES

Enforce Social Distancing

REDUCTION IN SHARED SPACES

Limit Capacities in Shared Spaces

FURNITURE LAYOUTS

Incorporate More Space and Divisions

CIRCULATION

Enhance the Flow of People and Directional Paths

PROTECTIVE SHIELDS

Add Screens for Reception Desks and Workstations

WAYFINDING SIGNAGE

Graphics to Communicate New Guidelines

MATERIALS AND SURFACES

Regularly Disinfect Common Touchpoints

AIR QUALITY

Enhance Filtration and Increase Ventilation

PERSONAL PROTECTIVE EQUIPMENT

Encourage Use of Face Masks

PUBLIC SPACES

Make Common Areas Safe for High Traffic and Continual Use

Our Design team will assess your needs and help you develop a plan that effectively creates a safe and comfortable environment based on the guidelines and best practices in response to COVID-19.

More specifically, we offer the following:

- Virtual or in-person visual assessment of your facility.
- Floor plans with required adjustments.
- Distancing space planning.
- Product or procedure recommendations.
- HVAC system design and modifications and UV lighting design with our MEP team.
