

GRANT FUNDING

Unlocking funds to deliver your best tomorrow.

When available funding isn't enough—or doesn't exist—that's where we come in. CPL routinely helps communities navigate the grant application process, putting clients in touch with the right funding resources, and assessing needs to effectively put your funds to good use.

CPL is your best trekking partner.

Quality of life, public infrastructure and steady growth define healthy, vibrant communities. Yet when it comes to securing funds for key projects to achieve this ideal, the journey can be stubborn and grueling. Limited capital, strict use regulations, time constraints, fierce competition, and more, make navigating the rocky terrain of public grants an arduous climb.

Our Community Practice has pioneered teaming with municipalities to ease the burden of procuring public monies, helping clients acquire additional capital through grants to match up to 75 percent of their total project costs. This experience has given us a deep understanding of the application process, enabling us to develop strong relationships with various funding and regulatory agencies along the way.

As your partner, we shift the journey from reactive to proactive, and leverage our edge with your community's unique fingerprint and vision. Our foresight and planning credentials strategically position us to identify potential "shovel-ready" projects, prepare competitive grant applications, and deliver financial support for your greatest impact.
